PROJECTS

Ask My PDF – Agentic RAG PDF Assistant — [GitHub](#) Jul'26

- Built an AI-powered PDF question-answering app that lets users upload a PDF and query its content in natural language, deployed live on Streamlit Community Cloud.
- Implemented a Retrieval-Augmented Generation pipeline with PDF chunking, Hugging Face embeddings, and semantic search over a ChromaDB vector store.
- Designed a LangGraph-based agent with document-search and calculator tools, using Google Gemini to generate grounded, context-aware responses.
- **Tech Stack:** Python, Streamlit, LangChain, LangGraph, Google Gemini, Hugging Face, ChromaDB, PyPDF

Credit Risk Prediction — [GitHub](#) Jan'26

- Designed and ran controlled experiments across multiple classification models on financial and applicant data, benchmarking each with accuracy and ROC-AUC to identify the best-generalizing approach.
- Built a data cleaning and transformation pipeline handling missing values, feature scaling, and train-test splitting to ensure data quality before model training.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib

Mutual Fund Analysis Dashboard — [GitHub](#) Jan'26

- Built a data pipeline to extract, clean, and transform mutual fund data before loading it into Power BI for analysis.
- Designed a data model with DAX measures and created dynamic charts, KPIs, and slicers for fund comparison and trend analysis.
- **Tech Stack:** Power BI, Power Query, DAX, Microsoft Excel, Data Modeling, Data Visualization.

TRAINING

Lovely Professional University — [Certificate](#) Jun'25 - Aug'25
